

# DI Isolated Barrier

## NPEXA-K51

Single input, single output

## NPEXA-K511

Single input, double outputs

Input: dry contact or proximity switch  
Output: relay

Digital input isolated barrier, it converts switch or proximity detector signals (dry contact or NAMUR) from a hazardous area into relay signals to a safe area by isolation. Operation mode, output 2 function and the input circuit fault detection function can be set with the DIP switch. The input, output, and power supply are galvanically isolated from each other.

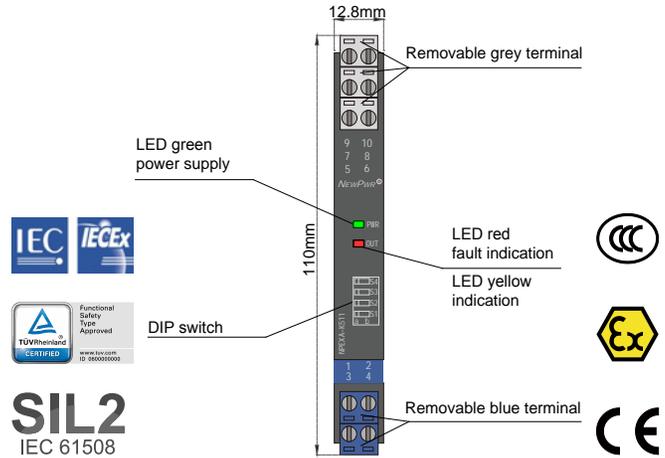

### Parameters

Power supply:	20V DC ~ 30V DC (Reverse power protection)
Power dissipation:	1W
Input signal:	Dry contact or NAMUR
Switching trigger point:	Input signal > 2.1mA, signal "1", the yellow LED is always bright Input signal < 1.2mA, signal "0", the yellow LED goes out
Open-circuit voltage:	Approx. 8.5V
Short-circuit current:	Approx. 8.5mA
output signal:	Relay contact
Load capacity:	250VAC/2A, 30VDC/2A
LFD function:	When input current $\leq 50\mu\text{A}$ , considers the input line breakdown, the apparatus enters into safe function state, the output relay de-energized. If input current $\geq 6.5\text{mA}$ , considers the input circuit short-circuit, the apparatus enters into safe function state, the output relay de-energized, the indicator red flashing
Relay mechanical life:	> 100000 switching cycles
Switch frequency:	< 10Hz
Energized/De-energized delay:	< 20ms
Electromagnetic compatibility:	IEC 61326-3-1
Dielectric strength:	$\geq 3000\text{V AC}$ (intrinsically safe side / non-intrinsically safe side) $\geq 1500\text{V AC}$ (Power supply/non-intrinsically safe side)
Insulation resistance:	$\geq 100\text{M}\Omega$ (Input /Output/Power supply)
Operation temperature:	$-40^{\circ}\text{C} \sim +70^{\circ}\text{C}$
Storage temperature:	$-40^{\circ}\text{C} \sim +80^{\circ}\text{C}$
Dimension:	12.8mm (W) $\times$ 110mm (H) $\times$ 117mm (D)
Safe state:	de-energized

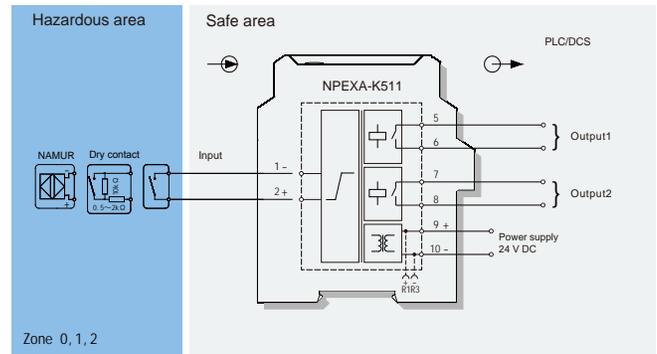

### DIP switch settings

NPEXA-K51/NPEXA-K511(NPEXA-K51 can set S1、S2)

Switch	State	a	b
S1		output1 normal mode	inverted mode
S2		LFD on	LFD off
S3		output2 normal mode	fault signal output

### Wiring diagram
